?

WHAT THE---

WHERE DID YOU COME FROM?

THIS IS THE TRAWLER GUJARAT MAIDEN TO ANYONE IN RANGE.

A GREAT BIG BLOODY ISLAND JUST FORMED IN FRONT OF MY EYES...

...COORDINATES ZERO ONE DEGREES, TWENTY-FIVE MINUTES NORTH, BY SEVENTY-TWO DEGREES, TWENTY-TWO MINUTES EAST. REPEAT---

After appearing as if from nowhere, and with no geologic evidence to support it...

...the Indian Ocean's newest landmass has been claimed by no less than a dozen nations and groups, some moving their military in as if to enforce those claims.

Such a military conflict feels inevitable, perhaps even imminent. The idea of brand-new land in an otherwise ravaged world is a powerful draw.

But what is not known to the surface vessels is what an underwater survey is just discovering: this is not an island in the conventional sense, created from lava flow or seismic upheaval. In fact, it is not connected to the ocean floor or to anything else.

It's floating.
