## WELCOME TO RAI #7. WELCOME TO 4001 A.D.

### THE STORY SO FAR

First, there was a murder. Then, there was a massacre. Now, there will be a war.

After New Japan's first homicide in a thousand years, tensions began to rise among the populace. A faction of anti-technology insurgents called Raddies has capitalized on the murder to step up their campaign of terror, slaughtering hundreds of PTs—Positronic AI companions.

Emboldened by their beliefs, the Raddies are mobilizing their forces in the Prehistoric Replica sector to stage a devastating assault on the nearby PT Factories. To get there, they'll need to pass through the Fungal Farms, where a secret army of Positrons lies in wait, led by the free-willed PT Momo and the mythic sewer dweller Izak.

Now, New Japan's protector Rai must broker a peace before war breaks out in the hopes of uniting the two sides against the true threat—the fascist, unseen ruler of New Japan called "Father." But as the time for diplomacy begins to run out, Rai's only hope may lie in a desperate gambit by his ally Spylocke to recruit a long-forgotten warrior down on Earth.
