

Out of the stove, no way to determine if a shot was fired. Would the shot have broken the glass and flooded the waste? Unlikely.

...Ma...

...Ma...wake up!

Vials and pills at the stove. The safe was open. I'm sure that vaccines broke the molten. Who profits and how? Did they take a vaccine or destroy it?

Walt's wound...not a gunshot. Glass and water pressure. The glass broke. Water with enough pressure to cut him nearly in half.

Happened before he could activate his emergency suit's life support.

But to stay focused on the facts...keep our history out of it.

But what...what if our history has the answer? Why history...or one of them?

I've got to remember everything. But in an organized way...have to stay focused.

I have to...

WAKE UP!

NATIONAL SELF-DEFENSE

JOURNAL 9

Jokame  
damned us all.  
I told you we should've  
locked 'em up nice and  
seal 'em to the  
surface.

O...I  
know.

But now Jokame is  
out, only hope, we can  
insulate us and clean-  
suck systems.

Then we just  
let the team up  
top know...

And we  
can all get back to  
the surface.

An hope you  
right, Roger. We're in  
the last viable leg of the  
headquarters.

Once this  
gases? We scan out  
of places to scan  
to.

But?  
Anton? Why?  
It's Roger.

We're still in the  
headquarters. I'm opening  
a channel so we can stay in constant  
contact. It's going to take careful  
coordination to get out  
of this.
