Sam Wilson was a Harlem social worker until Captain America persuaded him to become the high-flying **FALCON**. Bucky Barnes was Captain America's sidekick until he was captured and turned into the ruthless **WINTER SOLDIER**. Both were Captain America. But that doesn't mean they always see eye-to-eye...

When the Winter Soldier was attacked at his home, he sought answers from his current employer, the anti-terrorist organization called the O.F.U., only to discover all of the employees had been killed. The Falcon also arrived at the O.F.U. seeking a missing member of his veteran's support group. The two teamed up to find the Winter Soldier's O.F.U. handler, Veronica Eden, but their visit was interrupted by the arrival of a young and powerful new member of Hydra. He challenged Falcon and Winter Soldier to come after him and try to stop Hydra's resurgence, then beat them unconscious...
