

Oh? I thought you were in your tiny little office, you cleaned your tunnel?

Why do I hear metal clinking into my recliner?

It's just a little stuff. Don't worry 'bout it.

Just hold on to something! till it passes.

It might get a little rough so you might want to tie yourself to something.

Don't forget to use your recliner. You'll do just fine.

'Water' is
rising 'real.
