ZOMBIES VS ROBOTS

Inherit the Earth: Fritz Winterbottom, whose persona now resides in Warbot 7-G, has assembled an army of warrior-class bots to accompany him on his mission to kill zombies... and find his way to the moon to mete out justice to the unknown figure who's trying to destroy him. But that same shadowy figure has sent down an all-new threat to attack the Warbot—the electronic Virus! Meanwhile, the six astronauts who have returned to Earth have been assaulted by Mermen who have taken them deep under water—directly under the Grecian land where a zombie Minotaur once savaged a city of Amazons—and seeks to make them a meal for the creatures inside his zombie aquarium!

The Orphan: Bot-Bot throws down with a six-legged robot-monstrosity, and he's forced to pull out the big guns! But this victory is short-lived. Bot-Bot knows there are more threats coming—robot and zombie alike!—so Rosemary lends a hand to her mechanized friend in fortifying their home, and even Bot-Bot is treated to a much needed upgrade!
