

When science geek Peter Parker was bitten by a radioactive spider, he was imbued with amazing abilities: the proportional strength and speed of a spider, adhesive fingertips and toes, and a precognitive awareness of danger called "spider-sense." After inadvertently playing a part in the death of his Uncle Ben, Peter learned that with great power there must also come great responsibility, and now fights crime as the web-slinging, wall-crawling wonder called...

The AMAZING SPIDER-MAN

Recently, a pharmaceutical company called New U has been delivering medical miracles to willing test subjects who have been failed by standard medicine. But when one of their patients set off Peter Parker's spider-sense, he decided that the situation warranted a closer look — as The Amazing Spider-Man!

What Peter discovered was nothing short of a nightmare. New U was secretly being run by the Jackal, one of Spider-Man's oldest foes. For months, he's been using his technology to bring Spider-Man's long lost friends, foes, and loved ones back from the dead! Why on Earth would he do that?

Meanwhile, Kaine Parker, one of the Jackal's very first clones, has made an even more terrifying discovery — whatever the Jackal's been doing at New U has happened on other Earths across the Multiverse, and on every one of them, the people who have received New U treatments have turned into infectious, zombie-like creatures called Carrions.

Together, he and Gwen Stacy of Earth-65 developed a plan to stop the Jackal, and Gwen has been operating as a mole at New U for weeks. But when her cover was blown as a result of Spider-Man's snooping, they had no choice but to run for their lives!
