Quantum & Woody created by MD Bright and Priest

Before Woody discovered that Eric had hidden his biological father's existence, before Negative One raided the Warehouse, before Eric found himself handcuffed and flying to Australia, there was an incident with the Goat.

When a lab accident downloaded a backup of Derek Henderson's consciousness into a goat, he spent the next few years kept as the house-pet of the world's worst superhero team, Quantum and Woody! Who also happened to be his children. But Thomas Edison, the arch-nemesis of Quantum and Woody, sent his goons after the goat and triggered an energy anomaly that would send the goat into labor. So Quantum and Woody brought the goat to the zoology lab at the Smithsonian in order to find help. This is the previously untold story of what happened next...

ERIC HENDERSON

Eric Henderson is Quantum! After a lab accident destabilized his molecular particles, Eric discovered that he could create forcefields at will. Military training and a sense of responsibility make him the perfect hero.

WOODY HENDERSON

Woody Henderson is Woody! In the same lab accident as his adoptive brother, Woody discovered he had the ability to shoot energy blasts from his hands. He's a little reckless, but that makes him the fun one.

DEREK HENDERSON

Every superhero origin story begins with some tragedy. For Quantum and Woody, that tragedy was losing their father, Derek Henderson, a brilliant scientist on the forefront of quantum energy studies.
