

FIGMENT 2

Dreamfinder, the legendary inventor from the Academy Scientifica-Lucidus, and **Figment**, his companion, saved the Earth from a destructive force inadvertently unleashed by Dreamfinder's own Integrated Mesmonic Converter. In doing so, the pair traveled from their own time and place in 1910 London through a portal to 21st-century Florida.

There they discovered the Academy has reopened anew, and that in the intervening years their legacy had grown to epic proportions. **CHAIRMAN AUCKLEY**, head of the new school, doubted the duo's authenticity, but **FYE**, a sound sprite friend of Figment and Dreamfinder from their first adventure, used his status as professor to vouch for them and give them a chance to address the school with a demonstration. Dreamfinder's self-doubt grew, climaxing with the failure of his invention at the demonstration, which allowed a living Doubt creature hiding inside him to break free and take over his body. The newly formed **DOUBTFINDER** used his powerful influence to imprison all of the minds at the Academy, squashing creativity to usher in an era of fear and doubt.

Unaffected, Figment fled the Academy in search of help—in search of someone with a spark of creativity powerful enough to defeat the Doubtfinder...

Figment

Dreamfinder

Chairman Auckley

Fye

Florida, USA.

Somewhere in the swamp.

What now, what now?

Dreamfinder lost...

Fye, the Chairman, the teachers, and the students...all trapped.

It's the worst it's ever been...

I need to find help...

Somewhere... anywhere.

Oh?

What's that?

I'd recognize that shining beacon anywhere...

...that's the light of imagination!

Someone is using dream power!

It's time for bed, Capricious! Go to sleep!

Okay, mom!

fwoosh!

I just need to finish these schematics.

Inspiration doesn't have a bedtime...

huh?

fwip

sigh

Dear Mr. Harmony:
Thank you for your enthusiastic thesis submission and subsequent repeated correspondence about your current application status.
All of us at Scientific-Lucidus-USA acknowledge and appreciate your family's connection to our esteemed institution, but due to academic requirements we cannot offer you a seat in our Invention & Ingenuity program until you reach physical maturity.
I do hope you keep up your scientific studies and I look forward to your application at a future date.

Sincerely,
Austin Duckler
Chairman, S&I
