"The watch
didn't work."

LONDON

What do you MEAN it didn't work?

The remote detonator. It malfunctioned and deployed the flash-flare instead. Gave away my position.

I had to shoot my way back inside and blow the damned thing manually.

The detonator works perfectly, O07. Tested it myself.

I assure you the problem is USER error.

Check it in along with your gun and I'll--

Think I'll keep it, thanks. The time function works and it says I'm due with M.

Besides, it looks rather smart on the USER.

ALL equipment is to be returned, O07! I expect you've got my missing signal jammer as well!
